

ISPilot Platform Overview

Executive Summary

ISPilot is an enterprise AI platform designed to provide retail business users with natural language access to Intelligent Shelf operational data.

The platform transforms operational metrics into actionable business insights through a specialized multi-agent architecture powered by:

- Google ADK
- Vertex AI Agent Engine
- Gemini
- BigQuery
- Secret Manager

Instead of requiring dashboards, SQL knowledge or analyst intervention, ISPilot enables users to interact with retail performance data using natural language.

Business Vision

ISPilot is not a chatbot.

ISPilot is a retail intelligence platform powered by AI agents.

The objective is to create reusable business capabilities that can be consumed through:

- AI Agents
- APIs
- Microsoft Teams
- Copilot Studio
- Future applications

Business users should be able to ask:

How is Talca Colin performing?

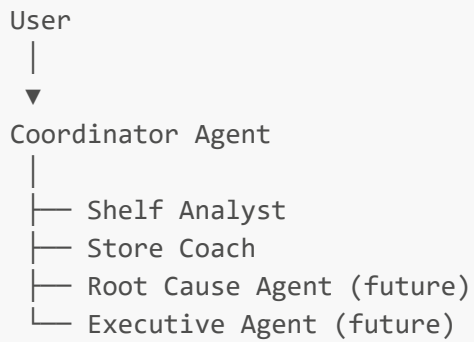

How can Talca Colin improve?

What are today's priorities?

What stores require immediate attention?

without needing direct access to dashboards or reports.

Functional Architecture

Coordinator Agent

Responsible for:

- Intent classification
- Request routing
- Agent orchestration

Does not perform analytics.

Does not access data directly.

Shelf Analyst

Answers:

What is happening?

Examples:

How is Chile today?

How is Talca Colin performing?

What are the rankings?

What are the trends?

Store Coach

Answers:

What should I do?

Examples:

How can Talca Colin improve?

What actions should be prioritized?

What should be fixed first?

Technology Stack

- Google ADK
- Vertex AI Agent Engine
- Gemini 2.5 Flash
- BigQuery
- Secret Manager
- Python 3.12

Current Status

- ☒ Coordinator Agent
- ☒ Shelf Analyst
- ☒ Store Coach
- ☒ Multi-Agent Routing
- ☒ Vertex AI Agent Engine
- ☒ BigQuery Integration
- ☒ Secret Manager Integration
- ☒ REST API
- ☒ Vertex Playground Validation
- ☒ Ready for Copilot Studio Integration
- ☒ Ready for Microsoft Teams

Production Runtime

Current production deployment:

```
projects/390358249123/locations/us-  
central1/reasoningEngines/4655320687131492352
```

Deployment

```
adk deploy agent_engine \  
  --project=corp-stro-salesinventory-prod \  
  --region=us-central1 \  
  --display_name=intelligent-shelf-coordinator \  
  --extra_packages common \  
  --extra_packages services \  
  --extra_packages gateways \  
  --extra_packages repositories \  
  --extra_packages domain \  
  agents/coordinator
```

Strategic Roadmap

Phase 1

☒ Shelf Analyst

Phase 2

☒ Store Coach

Phase 3

Root Cause Agent

Phase 4

Executive Agent

Phase 5

Recommendation Engine

Phase 6

Microsoft Teams Integration

Phase 7

Enterprise Observability

Phase 8

Enterprise AI Platform Expansion
